As the leader in the restoration industry **Puroclean** pledges to save property and contents faster and with maximum cost efficiency.

## health, safety, insurance

### THE ISSUES

Concern about the consequences of mold contamination has become one of today's top subjects.

- Owners and renters alike are seeking more extensive compensation for damages
- Mold damage that is not remediated properly & quickly can turn into huge losses & claims
- The press and other media have made all consumers more aware of the potential health hazards of mold that is untreated or not properly remediated
- Prompt action by the well-trained professionals at Puroclean is the very best way to minimize both restoration costs & claim potential

## the Puroclean process

### PREVENTION/TIMELINESS

Having **Puroclean** handle your water loss is clearly the very best way to prevent mold! However, when mold does occur, it is essential that it be treated **As Soon As Possible!** The trained, certified **Puroclean** professionals are, again, the very best choice. Their professionals will:

- Fully assess the complete scope of the problem
- Work with Environmental Professionals when appropriate
- Establish a complete plan of action
- Reduce the moisture in the affected areas
- Monitor indoor air quality at all times
- Use appropriate drying and cleaning methods for contaminated materials and contents
- Identify, extract and eliminate the water source
- Secure, bag, & remove contaminated materials
- Communicate continually with all concerned parties

### MINIMIZE WATER DAMAGE

Water damage can be devastating and very costly. Understanding that timely response is essential, **Puroclean** responds to emergencies within one hour.

### REDUCE RISK OF MOLD

One of the benefits of using **Puroclean** professionals for water losses is that mold usually is avoided altogether. However, if mold has already developed, **Puroclean** are the professionals to call to remediate the problem.

## facts

### IMPORTANT MOLD

- Exposure to mold can result in serious health-related problems
- Moisture from rain, water damage and high humidity accelerates mold and bacteria growth and can cause structural damage.
- Mold can grow on virtually any substance, with the presence of moisture.
- There are more than 100,000 species of mold of which at least 1,000 are common in the United States.
